These are the component applications:

- GENIUS TOOLS Environment Administrator for managing operating environments
- GENIUS TOOLS Project Configurator for configuring projects in an operating environment
- GENIUS TOOLS Starter App for starting configured projects
- GENIUS TOOLS Config Editor for editing configuration blocks
- GENIUS TOOLS Git Utility for checking in to Git and version management

4.1 Hardware and software requirements

GENIUS TOOLS Starter (GTS) works on all computers that fulfill the requirements for Creo 7.0 to Creo 12.0.

... \ *serveronly* \ *_SyncResults* \
- Central user configuration files
... \ *userdata*
- Common databases for GENIUS TOOLS for Creo name generation (has to be configured manually)
... \ *serveronly* \ *gt_numgen*

Warning: This functionality cannot be used offline.

Cadpool

Read / write access: The user needs full write access to the local Cadpool for synchronization to work.

Client computers

Write access: Write access needs to be granted to the following Creo installation directories

- if more than the standard key (e.g. *parametric.psf*) or the synchronization of the start key is to be used: to the directory that contains Creo startkeys,
- if the Creo configuration files *config.sup*, *config.pro*, *creo_parametric_admin_customization.ui* need to be adapted: to the directory ..
`\CommonFiles\text`

Please note: If Creo is installed into the Windows default program directory, you should not make any changes with GENIUS TOOLS Starter App. Install Creo into another directory, for example C:\ptc.
